  "transcription": " What's your name? My name is Alex. Alex, what do you love? I love a lot of  
things. I love films, I love reading books, non-fiction books. I love everything machine learning and  
data science related, Python programming, and AI agents. Of course, AI agents. What would you  
love to gain the most from this event? event? I'd love to see people who are trying out agent  
frameworks like Krew.ai or Autogen and people who are running into issues and also most  
importantly people who are trying agent ops that's my company and seeing any issues they run into  
or any valuable insights they get from using the product. Okay amazing amazing."
